

Edwar Cedeño

Software Developer

I am a full stack developer, passionate about new technologies, good code and great challenges. Throughout my career I have acquired knowledge in a variety of languages and frameworks such as Vue.js, React.js, Node.js, PHP, Python and more. My experience also covers server management, as well as webscraping, unit testing, process automation and the crypto world.

Education

2012-2016

Systems Analyst (Higher Technician degree)

UNEFA - Venezuela

Expertise

- Python
- Javascript
- PHP
- Node.js
- Vue.js
- Laravel
- Test Automation
- Web scrapper
- GIT
- CI/CD
- Docker
- Microservices

Language

English (A2)

Spanish (Native)

Experience

2022 - Current

Creed&Bear | Dubai, UAE

Backend Develop | Team leader

With this new opportunity, I led and was part of the backend team, acquiring skills in information gathering. I delved into architectures, design patterns, Docker, CI/CD and the fascinating world of cryptocurrencies. I integrated knowledge to develop solid and scalable projects. I implemented continuous integration practices, deployments and automated testing to ensure code quality. This experience has allowed me to grow in leadership and understanding of the latest technology trends.

2019-2022

Athmos | Bogota, Colombia

FullStack Developer

In this great stage I expanded my knowledge in development with a variety of frameworks and technologies. I started in the world of front-end frameworks, such as React, Angular and Vue.js, which allowed me to create modern web applications. In addition, I had the opportunity to explore more in the popular Laravel framework, taking advantage of its advanced features to develop scalable and secure web applications. I also ventured into the world of Python, using this language to develop efficient tools and scripts, including the use of web scrapper to obtain data from websites. In addition to my development experience, I acquired skills in the field of automated testing, using Selenium and Unittest. These new experiences provided me with a more diverse set of skills that allowed me to take on new challenges.

2016-2018

FreeLance - Venezuela

FullStack Developer

In my first jobs I worked as a full stack developer, focusing on PHP, jQuery, Laravel and Bootstrap. I used PHP to create dynamic web applications, while jQuery simplified user interaction. I also worked with Laravel to develop applications in an efficient and structured way. I used Bootstrap to design responsive interfaces. These initial projects provided me with the opportunity to face real challenges, work in a team and improve my technical and problem-solving skills.
